Workforce Region(s): Southwest

Career Cluster Maps

The P2C Career Cluster Maps provide an overview of regional high-demand occupations associated with various job zones (i.e., levels of education and training). The purpose of these maps is to assist educators and students in developing awareness of entry and exit points within a particular career field. The maps have been developed to align with the National Career Clusters Framework and rely on the O*NET job zone classification system to accurately assign occupations to job zones. Labor market data displayed in the cluster maps was collected from state and regional labor departments to reveal market demand and median wages for each occupation. In using these maps, educators and students can quickly gain a sense of potential high-value career opportunities and the level of education and training needed to prepare for these professions. This can promote the alignment of education practices with regional careers and assist students in making informed career decisions that take into account regional labor market demands.

Career Cluster Map Data					
Data Category	Data Description	Potential Application			
Occupations by Job Zone	Occupations listed by highest projected demand within each job zone	 Understanding Entry and Exit Points – Educators an students can identify employment opportunities that ar highest in demand at various education levels. This ca be used to encourage informed decisions about when t enter and exit education/training programs. 			
Annual Openings	Projected annual openings displayed for each occupation	 Evaluating Employment Opportunity – Occupations that are higher in in annual openings offer more opportunit for students. Educational practices can be directe toward preparing students for occupations that ar highest in demand. 			
Median Wage	Median wage data listed for each occupation	 Assessing Occupation Value — Data related to media wages can be used to determine which occupations offer the most value to students. Career readiness efforts can target high-value occupations with higher wages, as we as higher annual openings. 			

^{*} Few occupations in these pathways require education at this level.
